TX CATALYST POLICY

1. Purpose & Objectives

Tx Catalyst is an officially sanctioned internal platform designed to bridge the gap between frontline delivery teams and business development opportunities. It provides every project delivery professional with a structured, transparent, and rewarding channel to log, propose, and escalate ideas and opportunities observed during client engagements.

The core objectives of Tx Catalyst are:

- 1.1 To create an official pathway for delivery teams to report potential business opportunities - from existing clients (upsell/cross-sell) and new clients (referrals or leads).
- 1.2 To reward employees whose submitted ideas, convert into business outcomes.
- 1.3 To foster a culture of innovation, shared ownership, and proactive client engagement across all delivery functions.
- 1.4 To reduce opportunity leakage - i.e., valuable insights that are currently observed but never formally captured or acted upon.

2. Scope and Applicability

This policy applies to all employees in a client-facing or project delivery capacity, including but not limited to:

Role Category	Examples	Applicable
Engineering & Development	Software Engineers, Tech Leads, Architects	Yes
Quality Assurance	Manual/Automation Testers, QA Leads, ASTM Professionals	Yes
Business Analysis	BAs, Functional Consultants, Process Analysts	Yes
Project Management	PMs, Scrum Masters, Delivery Managers	Yes
Support & Operations	L1/L2/L3 Support, DevOps, Site Reliability Engineers	Yes
Non-delivery Roles	HR, Finance, Internal IT	No (unless co-assigned to a project)

Part-time project contributors and vendor/contractor staff embedded on delivery teams may also use the platform, subject to approval from their Delivery Head

3. What qualifies as an Opportunity?

An opportunity is any observation made during a client engagement that may have commercial, operational, or strategic value. Opportunities can fall under the following categories:

3.1 Upsell Opportunities (Existing Clients)

- Identification of a client's pain point or inefficiency not currently being addressed by the engagement.
- Proposal of a new service, module, or capability that the client could benefit from.
- Spotting a manual or repetitive process that can be automated or optimized.

Example: A QA professional working on ASTM (Automated Software Testing & Management) notices the client performs 400+ manual regression tests each sprint with no AI-assisted layer. They log a proposal for an AI-powered test automation solution.

3.2 New Client Leads

- Client contact refers to another organization that may have similar needs.
- A delivery team member becomes aware of an adjacent business unit or subsidiary not yet engaged.
- Word-of-mouth lead generated through delivery interactions.

3.3 Innovation & Transformation Ideas

- Suggestions for introducing new technologies (AI/ML, cloud, automation) into a client environment.
- Process re-engineering proposals backed by on-ground observations.
- Ideas that could become case studies, packaged solutions, or accelerators.

Note: Ideas do NOT need to be fully formed to be logged:

- A rough observation with context is enough to initiate the review process.
- The pre-sales and solutions teams will work with you to shape and validate the idea.
- No idea is too small - even ideas that do not convert immediately contribute to the knowledge base. Employees are encouraged to submit early-stage observations, provided sufficient context is available for review.

4. How the Platform Works - End-to-End Process

The following outlines the complete lifecycle of an opportunity submission on Tx Catalyst:

Step	Action	Responsible
Step 1 - Observe	Delivery team members identify a potential opportunity during a client engagement.	Team Member
Step 2 - Log	Opportunity is logged on Tx Catalyst with required details.	Team Member
Step 3 - Review (L1)	Delivery Head reviews the submission for completeness and contextual accuracy.	Delivery Head
Step 4 - Escalate	Approved submissions are forwarded to the pre-Sales / Solutions team.	Delivery Head
Step 5 - Evaluation	Pre-Sales team evaluates commercial viability, feasibility, and fitness.	Pre-Sales / Solutions
Step 6 - Pursue	If viable, a proposal or outreach plan is initiated with the client.	Pre-Sales / Account Mgmt.
Step 7 - Outcome	Opportunity is marked as: Converted, In Progress, Parked, or Not Viable.	Pre-Sales / Solutions
Step 8 - Recognition	If converted, the submitter is formally recognized and rewarded.	HR / Management

All status updates are communicated back to the submitting team member. Submissions will not be left unacknowledged.

Note: All client-facing discussions, proposals, commercial conversations, or outreach related to a submitted opportunity shall be handled only by authorized Sales, Account Manager, Pre-Sales, or Delivery leadership teams.

5. Submission Requirements

Every opportunity logged into Tx Catalyst must include the following minimum information:

Field	Description	Required
Submitter Name & ID	Full name and employee ID of the person logging the idea.	Mandatory
Client Name	Name of the client where the opportunity was observed.	Mandatory
Project / Engagement Name	The specific project or workstream where the observation was made.	Mandatory
Opportunity Type	Upsell / New Lead / Innovation / Transformation Idea.	Mandatory
Observation Summary	A brief description (3–5 sentences) of what was observed and why it represents an opportunity.	Mandatory
Proposed Solution / Idea	What solution, service, or capability could address the opportunity.	Mandatory
Estimated Impact	Rough assessment of impact - cost savings, efficiency gain, revenue potential, etc.	Recommended
Supporting Evidence	Any data points, client conversations (non-confidential), or process observations.	Optional
Urgency / Timeline	Is this time-sensitive? Is the client already evaluating alternatives?	Recommended
Delivery Head Sign-off	Confirmation that the Delivery Head has reviewed the submission.	Mandatory

6. Rewards & Recognition Framework

Tx Catalyst is built on the principle that ideas deserve acknowledgment. The rewards and recognition framework is structured around the outcome of each submission:

6.1 Tiered Recognition Model

Tier	Condition	Recognition
Tier 1 - Submission	Opportunity is logged	Internal acknowledgment; recorded in employee profile.
Tier 2 – Approved	Opportunity is evaluated and approved or Rejected by the delivery head	Formal mention in team communications; priority for future programs.
Tier 3 – Opportunity Created	Opportunity is created and shared with the sales department.	Monetary reward / gift vouchers + public recognition. Reward value determined by deal size - details to be shared separately.

Tier 4 -Strategic Win	Opportunity leads to a significant new client engagement or major upsell.	Special award, eligibility for recognition, and consideration for developmental opportunities.
-----------------------	---	--

Monetary rewards, gift vouchers, payout eligibility, approval of workflow, and payout timelines shall be governed by a separate Reward Structure Document. **No monetary reward shall be deemed payable unless confirmed in accordance with the approved reward framework.**

6.2 Team Incentives

In addition to individual recognition, delivery teams with the highest submission volumes and conversion rates will be recognized at quarterly team reviews and in organizational communications.

7. Confidentiality & Ethical Guidelines

All submissions must strictly adhere to the following ethical and confidentiality standards:

7.1 Client Confidentiality

- Employees must not upload, paste, attach, or otherwise share any client confidential information, personal data, credentials, access details, source code, screenshots, proprietary documents, or any other client materials that are subject to NDA, contractual restrictions, or confidentiality obligations, unless specifically approved by the authorized Delivery Head, Legal, or Compliance team.
- Opportunity descriptions should be based on observable processes and general assessments - not leaked or privileged client documents.
- If in doubt about what can be shared, consult your Delivery Head or the Legal/Compliance team before logging.

7.2 Intellectual Honesty

- Only log ideas that are genuinely your own observation or that you have permission to submit on behalf of a colleague.
- Do not duplicate submissions already logged by another team member. If you have additional context to add, use the supplementary input feature.
- Misrepresentation of an opportunity for personal gain will result in disciplinary action.

7.3 Non-Disruption of Delivery

- Logging an opportunity should never interfere with, delay, or compromise the delivery of the existing client engagement.
- Do not approach the client directly about a logged opportunity without explicit approval from the pre-Sales team.
- Tx Catalyst submissions are internal documents and should not be shared externally.

8. Roles & Responsibilities

Role	Responsibility
Delivery Team Member	Observe, identify, and log opportunities. Provide context and follow up when requested. Adhere to confidentiality standards.
Delivery Head	Review all submissions from their team for quality and completeness. Approve or reject within 5 business days. Escalate approved submissions to pre-sales.
Pre-Sales / Solutions Team	Evaluate escalated submissions for commercial viability. Initiate pursuit of actions where relevant. Provide status updates to submitters.

Account Manager	Coordinate with pre-sales on client outreach. Ensure the opportunity is pursued through the correct account channel.
HR / Recognition Team	Administer the rewards and recognition framework. Maintain records of conversions linked to submissions.
Tx Catalyst Platform Admin	Maintain platform integrity, resolve submission disputes, manage access, and publish platform updates.

9. Review Timelines & SLAs

Stage	Target Turnaround
L1 Review by Delivery Head	Within 5 business days of submission
Pre-Sales Acknowledgement	Within 3 business days of escalation
Initial Evaluation Outcome	Within 10 business days of pre-sales acknowledgement
Conversion Notification to Submitter	Within 5 business days of deal closure
Reward Disbursement	Within 30 days of confirmed conversion

The Tx Catalyst Scorecard is the official framework used to evaluate, score, and prioritize every opportunity submission. Each submission is scored by the Delivery Head (L1) and the pre-sales / solutions team (L2) across five dimensions. The scorecard ensures objectivity, consistency, and transparency in how ideas are assessed and progressed.

How Points Are Earned - The Opportunity Journey			
Stage	Points Awarded	Trigger Condition	Cumulative Total
Stage 1 Submission	+10 Points	The idea is logged and successfully submitted on Tx Catalyst by the delivery team member. Points are awarded immediately upon submission, regardless of outcome.	10 Points
Stage 2 Approval	+20 Points	The submission is reviewed and approved by the Delivery Head (L1) and formally escalated to the pre-sales / Solutions team for evaluation.	30 Points
Stage 3 Opportunity Created	+20 Points	The pre-sales team validates the idea and officially creates an opportunity in the CRM / sales pipeline, confirming active pursuit of the lead.	50 Points
Stage 4 Lead Won	+50 Points	The opportunity converts into a won deal, a signed contract, Statement of Work (SOW), purchase order, or confirmed upsell engagement.	100 Points

9.1 Points Rules & Governance

- Points are awarded per opportunity submission. A single employee may earn points across multiple independent submissions simultaneously.
- Points are non-transferable and tied to the individual submitter's profile on the platform.

- If two or more team members co-submit an opportunity, points are split equally or as agreed and documented at the time of submission.
- Points are awarded automatically by the platform upon each stage of trigger. No manual claim is required.
- In the event of a dispute over point attribution, the Tx Catalyst Platform Admin (hemang.jindal@testingxperts.com) will review and adjudicate within 5 business days.
- Points cannot be reversed once awarded, except in cases of confirmed policy violation or fraudulent submission.

10. Soft Launch Scope & Feedback

Tx Catalyst is currently in its Soft Launch Phase. During this period:

- Access is limited to selected delivery teams nominated for the pilot.
- All submissions will be manually reviewed with an enhanced support layer.
- A dedicated Tx Catalyst point of contact is available for queries and onboarding assistance.
- Platform features may be updated based on pilot feedback before the full rollout.

Participants in the soft launch are encouraged to provide structured feedback via email. Your input will directly shape the final version of the platform and its policy.

11. Policy Violations & Dispute Resolution

In the event of a policy violation or dispute related to a Tx Catalyst submission, the following process applies:

1. The affected party raises concern with the Tx Catalyst Platform Admin (hemang.jindal@testingxperts.com) via email/portal.
2. The admin - hemang.jindal@testingxperts.com team reviews the dispute within 5 business days.
3. If unresolved, the matter is escalated to the Delivery Head for final resolution.
4. All disputes are handled confidentially and without prejudice to the submitting employee.

Any misuse of the platform, false submission, misrepresentation, breach of confidentiality, unauthorized client communication, or submission made for personal gain may result in rejection of the submissions, withdrawal of points or recognition, restriction or revocation of platform access, and/or disciplinary action in accordance with the Company policy.

12. Policy Review & Updates

This policy will be reviewed every six months or as necessitated by platform evolution, business needs, or legal requirements.

The Company reserves the right to amend, suspend, withdraw, replace, or modify this Policy, in whole or in part, at its sole discretion. Any material updates shall be communicated to applicable stakeholders through official internal channels.

This document is intended for internal use only. Distribution outside the organization is strictly prohibited.
